YOU CAN, TOO.

You're intelligent. Driven. Talented. Capable. You have what it takes to make your dreams come true. And we have the experience and resources to help you reach your goals. Join the Ragin' Cajuns who are conducting meaningful research, creating works of art and setting themselves up for success here at UL Lafayette.
Stars, comets and…UL Lafayette? You bet. The common thread— they’re all in space. If that sounds far out, consider this. University researchers have sent radish seeds to the International Space Station to study optimal methods for growing vegetables in altered gravity. The efforts are key to NASA’s goal of putting scientists on Mars.

But human habitation of the Red Planet would require self-sufficiency beyond the know-how to cultivate fresh produce. Space colonies would be essential. The University’s on board for that mission, too. It’s developing a biorefinery system that would create potable water, convert carbon dioxide to oxygen and generate electricity.

Space, indeed, is a familiar frontier. Student researchers have designed and built four small, solar-powered satellites that orbit Earth on scientific investigations. Students say the projects are a blast. But, as with other University space research, assisting NASA exploration and technology development is the end goal.

UL Lafayette’s research is transforming the world with new ideas and new technologies.

We’ve earned the prestigious R1 designation for “very high research activity” from the Carnegie Classification of Institutions of Higher Education, meaning we’re among the top 3% of public and private research institutions in the United States.

This status reflects our commitment to Research for a Reason—applying our collective knowledge and expertise toward solving real-world problems. Under the watchful eyes of faculty mentors, you might find yourself planting native grasses that combat coastal erosion, mining data to find the best place to drill for oil, determining how the sun degrades solar panels at our testing facility, or developing vaccines and therapeutics that combat life-threatening illnesses.

Our groundbreaking work in computing, data science, clean energy, water management, and advanced materials and manufacturing is built upon the talents of our faculty and student researchers and enhanced by collaborative partnerships with business and industry partners and all levels of government.
Creativity and design make our world better.

In our programs, you’ll engage in intensive study to find and express your unique artistic vision of the world around you.

Whether you want to design spaces and products that will improve lives in your community, thrill audiences with award-winning performances, or focus on creating something beautiful, you’ll be able to hone your skills here.

UL Lafayette is the only university in Louisiana with one college devoted to artistic education and production. And, we’re proud to preserve and embrace the region’s heritage by celebrating and advancing the unique music and art of the Cajun and Creole cultures found here.

In the College of the Arts, you’ll be part of a community of passionate artists and scholars who are creating, producing and showcasing exceptional work every day.

“...this studio [ARCH 409] motivated me to think about buildings and the environment holistically. Everything I learned in this course gave me the skills to go out into the world, after graduating from UL Lafayette, with a sense of confidence and pride that helped me navigate the profession.”

William Netter
Architecture, Class of 2008

8 DEGREE PROGRAMS

BACHELOR OF MUSIC
  Performance
  Music Media
  Theory & Composition
  Piano Pedagogy
  Jazz Studies

BACHELOR OF ARTS IN MUSIC

The B.I. Moody III College of Business Administration is one of the best business schools in the country. We have a reputation for rigorous academics and career-advancing experiences. Here, you’ll learn how to tackle the challenges of working in a global economy through collaboration, critical thinking and ethical decision-making.

You’ll get practical experience and learn by doing. Professional land and resource management majors, for instance, manage an oil lease, while finance students can administer an investment portfolio for the UL Lafayette Foundation. And, internships abound.

At Moody Business, we prepare you to compete on a global stage and stand shoulder-to-shoulder with professionals from other top business schools. So, you can be sure that you’ll leave with the knowledge and skills that employers are seeking.

Our graduates are empowered with exactly what it takes to not only be successful employees, but leaders ready to take on the world.
UL Lafayette has prepared educators for more than a century, and those teachers have gone on to instruct hundreds of thousands of students across the nation.

That's the substantial influence the College of Education & Human Development has had on learning through the decades. Study teaching strategies and practices based on proven research. Learn to make ethical, effective decisions as a counseling professional. Study human movement through the combination of traditional classroom activities and experiential learning. You'll develop real-world skills through our partnerships with local schools and learn teaching strategies based on proven research. Our graduates meet the dynamic demands of learning and harness the power of technology to keep students engaged.

**EDUCATION & HUMAN DEVELOPMENT**

You'll develop real-world skills through our partnerships with local schools and learn teaching strategies based on proven research. Our graduates meet the dynamic demands of learning and harness the power of technology to keep students engaged.
Located at the heart of campus, Cypress Lake is home to winged, scaled and reptilian residents. UL Lafayette is the only university in the nation to have a managed wetland on its campus.
Educating engineers to solve tomorrow’s challenges.

Engineers help shape the future. They enjoy improving people’s lives through creative approaches.

Our programs provide hands-on experience through exciting projects and internships. Students have developed robots that can detect land mines and have helped develop biofuels from a variety of materials – including alligator fat.

You’ll acquire skills – such as leadership, management and innovation – that will help you excel throughout your career.

We’ll partner with you to develop a path for your own journey as an engineer, so you can do work that makes a lasting global impact.

COLLEGE OF LIBERAL ARTS

Expanding thoughts. Broadening horizons.

A liberal arts education is the best preparation for your life and your career in an ever-changing world.

The College of Liberal Arts provides a diverse foundation that will give you perspective on the past, an understanding of the present, and the flexibility to face the challenges of the future. You’ll gain valuable, marketable skills such as critical thinking, information synthesis, objective analysis, and effective oral and written communication.

At UL Lafayette, you’ll conduct field research and apply new technologies to help explain why people do what they do and find ways to influence the world in meaningful ways.

“UL Lafayette has one of the few master’s degree programs for speech-language pathology where electives are offered. This allowed me to learn more about how speech-language pathologists can serve the adult and geriatric populations.”

Mary McMahon
B.A. Speech Pathology & Audiology, M.S. Speech Language Pathology

Ice Age Era Artifacts Unearthed
A team led by UL Lafayette researchers has excavated thousands of Native American artifacts from a site in the Kisatchie National Forest.

RAGIN’ CAJUNS CAN reimagine healthcare.

A degree from the College of Nursing & Health Sciences opens many doors and prepares graduates to step confidently through those doors and into their careers.

Employers know a degree from UL Lafayette ensures they’re hiring a well-educated, compassionate health care professional who’s ready to help patients when they need it most.

The college’s reputation is strong — and it’s only getting stronger.

The recent acquisition of additional property and buildings adjacent to campus will enable the college to grow its enrollment, programs and student services.

Jenna Brewton
Nursing, Class of 2019

“The simulation experience was really valuable and I think definitely contributed to my success. And when we did simulation it always went along with what we were learning that semester - so if it was chest pains, you learned about open heart surgery. You never know what you’re going to see in clinicals — like maybe you’ve never seen an open heart patient before, but you saw it in simulation.”

NATIONAL LEAGUE FOR NURSING CENTER OF EXCELLENCE
UL Lafayette was awarded an NLN Center of Excellence designation for the 2020-2024 term. This prestigious recognition is based on faculty expertise in promoting student success and preparing expert nurse clinicians and leaders in health care.

RAY P. AUTHEMENT
COLLEGE OF
SCIENCES

We know scientific exploration and discovery lead to big breakthroughs and major innovations. That's why we encourage collaboration and independent thinking – so you can find better ways to understand, explain, and positively impact the world around you.

Our unique location makes UL Lafayette a hot spot for research ranging from coastal conservation and restoration to petroleum and gas exploration to radioactive dating to artificial intelligence to mathematical and computational modeling. You'll have the opportunity to do meaningful research alongside our award-winning faculty, who go to great lengths – and often great heights and depths – in the pursuit of knowledge. They bring that passion into the classroom, where you'll benefit from their innovative research and ideas.

“Without coming here, I wouldn't know the things I can do with my major or can do with my knowledge. Now, I see you can work for the government, work in brain surgery, work in engineering... everything comes together. You see where physics fits everywhere.”

Brianna Olalekan

RAGIN' CAJUNS CAN REALLY DIVE INTO THEIR STUDIES

Our students participate in competitive internships and research experiences across the globe!

Biology major Natalie Graham will study coral in Bermuda with a program funded by the National Science Foundation.
Living on campus means you’ll be close to new friends, good food and essential resources. Residence life is full of activities to participate in and fascinating people who will become lifelong friends. And studies show that students who live on campus do better academically, too! With easy access to your classes and campus resources such as the Office of First-Year Experience, Edith Garland Dupré Library and the Academic Success Center, it’s easy to see why.

At UL Lafayette, we share a sense of community, determination and joie de vivre — an exuberant enjoyment of life — that is central to the culture and spirit of Louisiana. The University proudly serves as the keeper of the Cajun and Creole cultures and celebrates this rich heritage within our traditions and everyday life on campus.

As a Ragin’ Cajun, you’ll be part of a supportive environment filled with intelligent, talented people and exceptional learning opportunities.

STUDENT ORGANIZATIONS
It’s a fact: students who are involved in campus organizations or extracurricular activities are more likely to graduate — so jump in!

With more than 200 organizations here at UL Lafayette, it’s easy to find other students who share your interests. From Greek life to service groups, there are plenty opportunities to help others, make lifelong friends and have a real impact on our community.

HEALTH & FITNESS
Our fitness center at Bourgeois Hall has all the equipment you need to get fit and stay active, including a rock-climbing wall and a variety of fitness classes. The Aquatic Center outside Bourgeois includes a lap pool and lazy river where you can cool off on hot days.

If you prefer competitive sports to the gym, you can join one of our many clubs or intramural teams.

ACADEMIC SUCCESS
UL Lafayette offers an array of services to help you succeed because we understand the importance of providing a better living and learning environment.

Whether you need tutoring for your next calculus test, are thinking about changing your major, or want tips for writing your resume, we can provide you with the amenities and support you need.

KEEP TRADITION ALIVE
As a Ragin’ Cajun, you’ll enjoy our time-honored traditions. Show off your spirit at Ragin’ Roar, our biggest pep rally of the year. Enjoy “a little something extra” on Lagniappe Day, including canoe races on Cypress Lake and more than 20,000 pounds of boiled crawfish.

And you’re in luck if you like parades — and in South Louisiana, who doesn’t? We have two: Krewe of Roux Mardi Gras parade and a confetti-strewn Homecoming parade.

ACADEMIC SUCCESS
louisiana.edu/student-success
KEEP TRADITION ALIVE
louisiana.edu/traditions
Happiness through knowledge. That’s been the Honor’s Program motto since its founding — and we proudly offer educational opportunities to match.

As an Honors student, your intellectual curiosity and interests are supported through challenging courses, independent study and research. You’ll take part in Honors Seminars, receive special advising, and have smaller class sizes, along with other perks.

You will be eligible to live in the Honors’ Living Community on campus and you’ll have exclusive access to the computer labs and lounges in Judice-Rickels Hall.

Apply for the Honors Program to enhance your university experience and become part of an intimate community of scholars from every discipline.

Living Learning Communities (LLCs) offer enrichment experiences to first-year students who are selected to participate. Members live together in a residence hall and attend special events created to help them explore their fields of study or shared interests.
The University of Louisiana at Lafayette is located in Acadiana—a region known for incredible food, music, hospitality and joie de vivre.

Lafayette is located in the heart of Cajun and Creole country, which you’ll find celebrated within our traditions and day-to-day life.

The second-largest Mardi Gras celebration in Louisiana happens right off campus each year. Major music and food festivals are held regularly, and people flock here to eat, dance and have a good time.

There’s a phrase we’re fond of: laissez les bon temps rouler, or let the good times roll. It’s more than a slogan. It’s a way of life. Join us, and experience it yourself.
