#### Personal Interest Statement

I chose my country, Serbia, because I'd never heard anything about this country before. I knew nothing about their culture, history, what they are known for, tourist attractions, and many more things. I wanted to challenge myself and try to be more open minded to things I never knew about a country rather than know some bits and piece of another country.

#### The Purpose of the Presentation

• For people to <u>learn</u> the culture, history, food, and clothing in Serbia

• For people to <u>discover</u> why Serbians wear the clothes that they wear

• For people to <u>investigate</u> on what makes Serbian people wear these types of clothing

• For people to learn more about a country, like Serbia, they never knew that existed or know little information about

# **Child Poverty in Serbia**

Researchers researched Serbia's child poverty due to their transgenerational issues; finding two key components of what were the causes:

- Amount of family members living in the same household
- The amount of income a family member makes

Researchers use Survey of Income and Living Conditions in 2015-2018; discovering:

- Mothers working decrease poverty while men increase
- One adult < two adults
- Parent's education
- Older children have lower rate of poverty

#### Conclusion

- Serbia's government gave social transfers to children
- Decreased transgenerational poverty by 25%
- Child poverty is still around in Serbia and most likely to never be able to recover
- Side Note: 2,200 Serbian children were sampled

#### Conclusions

- Serbia dealt with a lot of wars, rebuilding, and many other issues that impacted the country
- They now have even more issues with children
- Due to transgenerational child poverty in Serbia, children do not have enough money to live a healthy life
- Serbian children either take a path of getting married at a young age or being sold away to trafficking
- Although Serbia is improving little by little, there are issues that Serbians need to focus on rather than their appearance
- This leads to little to no information about Serbia's cultural impact on clothing or how it began
- The history, culture, religion, food, and issues all impact why traditional clothing is worn in Serbia
