

# ROOTS AND REBUILD

### HOW TO MAKE SURE THAT YOUR PROJECT SURVIVES

How do you go about it? It's not enough to just write down your ideas and get on with it. You need to think about the people who will be involved in your project and how they will be affected. You also need to think about the resources you will need and how you will get them. And finally, you need to think about how you will measure the success of your project.
