

# RAY

**1st Week of School**

- When I packed in, I was surrounded with new faces to meet and things to do.
- Being from New Orleans, Learning the city of Louisiana has been a bit more care for me to get accustomed to.
- I also find to team with a girl who I didn't know at all, and we have stayed close to how together better.

**2nd Week of School**

- I am involved in the cheer program in the School of Architecture and Design, and we always be found working on a new project or an assignment.
- I have also been trying to get involved with the cheerleaders at our lady or within school colors.
- Some of the Big activities I am involved in is the Scholastic program for them or our lady or within and I am a part of a Bible Study from the school.

**3rd Week of School**

- Even though I have a lot of free time between classes on Friday, most of that time is spent working on extra projects, since I started with my art, or hobby for me out of school.
- I have had to work with my classmates on group projects, one or what was a group design project, which had to design a game for the other before starting to play.

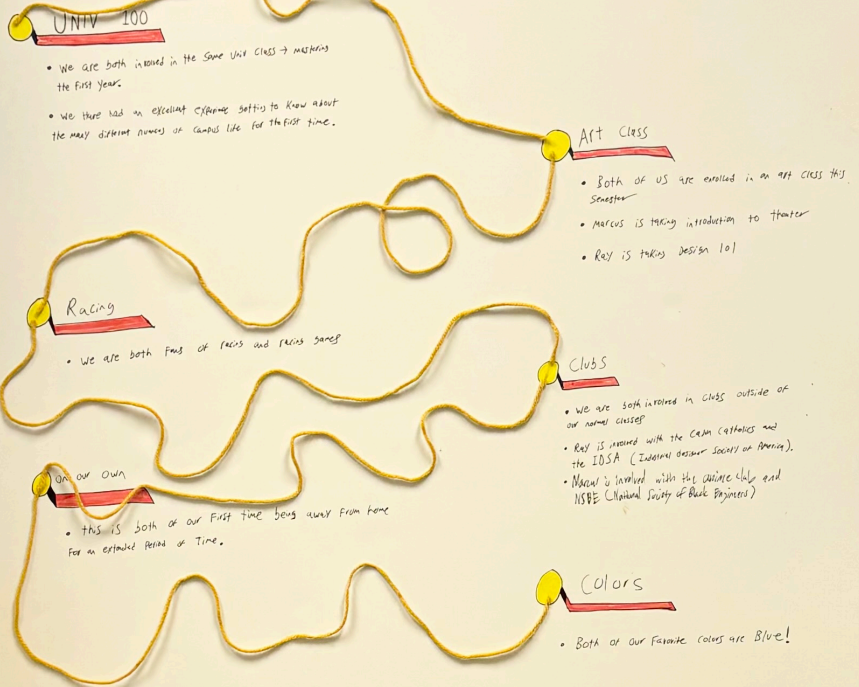

**4th Week of School**

- One of the biggest adjustments for me when I transitioned from High School to college was the amount of time I would be dedicating to studying and completing homework.
- Previously I was able to do most of my assignments during school and still have time to run in during my homework.
- Now, I spend much more of my time focusing on how the need to be complete in short periods of time, which does not give me a lot of free time to play with.

**5th Week of School**
