# Hilliard Art Museum

The Hilliard Art Museum was such a fun place to visit! The fact that it's on our campus is even cooler. It was very interesting to try and figure out the meaning behind the different art pieces with the group. We had the most fun at the Learning Lab, so we took our picture in front of it!

# STUDY SESSION AT THE CAMPUS GROUNDS:

After a tour of the Hillard Art Museum, we took a walk to Campus Grounds. During this time, we individually studied and generally just worked on a few assignments we needed to catch up on or notes we needed to study for an upcoming test.

1. **What is your name, major, and current year at UL-Lafayette?**

My name is Garrett Gryzbowski. I am in Business Management, and I am a Senior

2. **How Has your approach to studying and time management changed since your first year in college? Can you share any effective strategies or lessons learned?**

After struggling for the first year, during my sophomore year I was able to devote more time to school because I realized the importance of a college degree. Always remember to focus on assignments well before they are due. Doing so will relieve unnecessary stress so you can focus on what is in front of you.

3. **In what ways do you feel you've grown or changed the most since coming to college, both academically and personally?**

I have become more mature. I have also become much better at time management by learning good work ethic skills.

4. **What extracurricular activities, clubs, or organizations have you been a part of? How have they shaped your college experience or provided you with opportunities?**

I am in none of those things. I am happy with that decision because it gives me more time to focus on schoolwork.

5. **Can you describe a particularly challenging experience you have faced in college, whether it was academically, socially, or personally? How did you overcome it, and what did you learn from it?**

I was in QMET 352 which was very difficult. I was able to turn it around with focus and dedication and learned that if I put my mind to it, I can accomplish my goals with dedication.

6. **Now that you are an upperclassman, how do you view your post-graduation plans compared to when you first started? What advice would you give to underclassmen about preparing for their future careers or next steps after college?**

I have always wanted to be in business management, so my goals have not changed. Always invest your time wisely to achieve your goals. You must learn how society works to be a successful part of it.

# Homecoming Game

The homecoming experience was really fun, meeting up was an hassle between the traffic and service. But everything else was perfect , we didn't win the football game so everyone left early but the experience was GREAT !!!! one i'll remember forever!!Getting out the house hanging with my classmates was something I truly enjoyed.

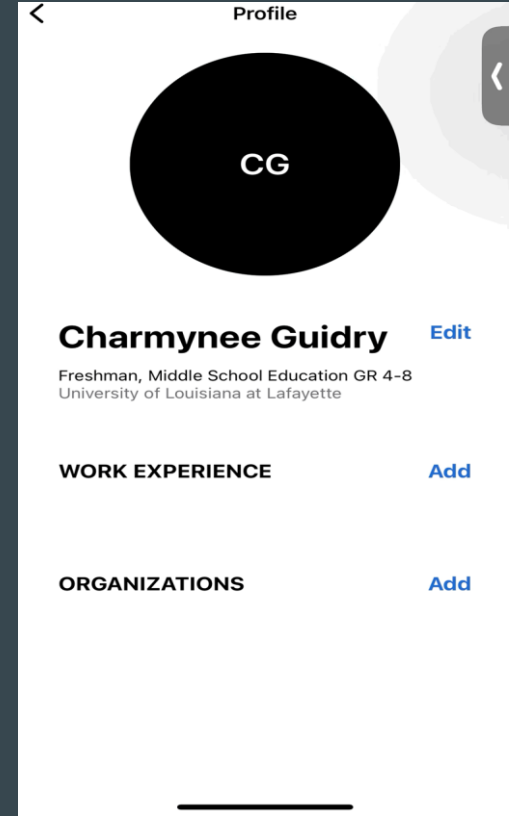

# Char'mynee Guidry

Knowing that the campus has the campus cupboard has opened my heart a little more for the school. This has shown me there are still some kind-hearted people out in the world that want to give. When volunteering, I hung clothes and also organized canned goods !!

Creating the handshake app allowed me to see the jobs I could choose from for on-campus and off.

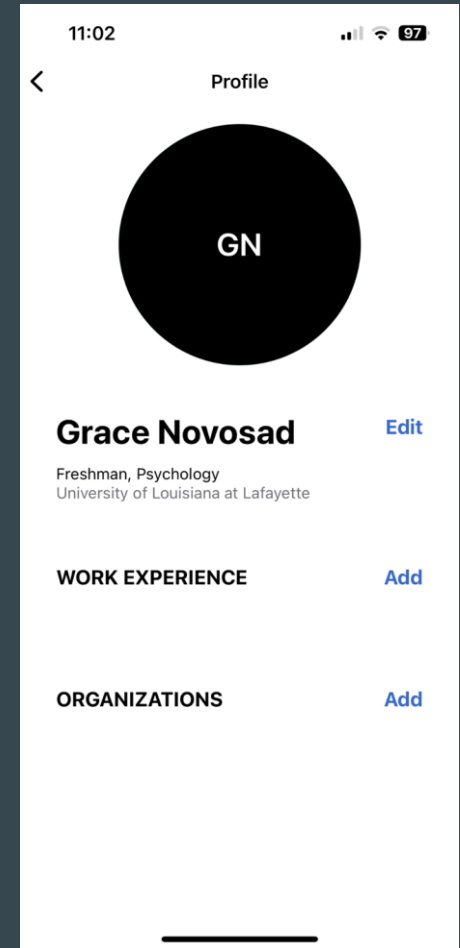

# Grace Novosad

Volunteering at the Career Closet, I genuinely had such a nice experience. The staff were very helpful in telling me what I needed to do, and I even became friends with one of the girls I was volunteering with! The entire concept of the Campus Cupboard and Career Closet is a wonderful thing, and I am very proud that we have something so nice on our very own campus.

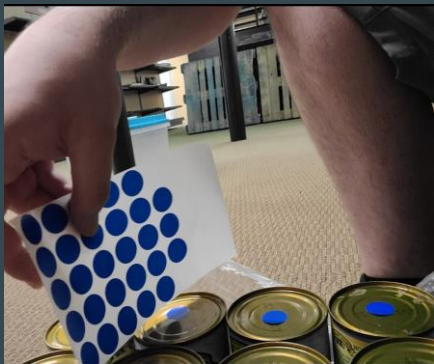

My Handshake profile will definitely help making the process of finding work in the future easier and less taxing.

# Michael Kobetz

I had a great time volunteering at campus cupboard. The service they offer is a treasure to campus. For those less fortunate, having the opportunity to wear a nice outfit for a job interview, or not having to worry about what is for dinner is an immeasurable gift.

Handshake is a great application that helps focus job searches and gives people an opportunity to progress towards their career. It connects over 900 universities, 500k employers, and 17 Million Students

Creating this handshake profile has showed me that it's a really great way to make connections and gain opportunities.

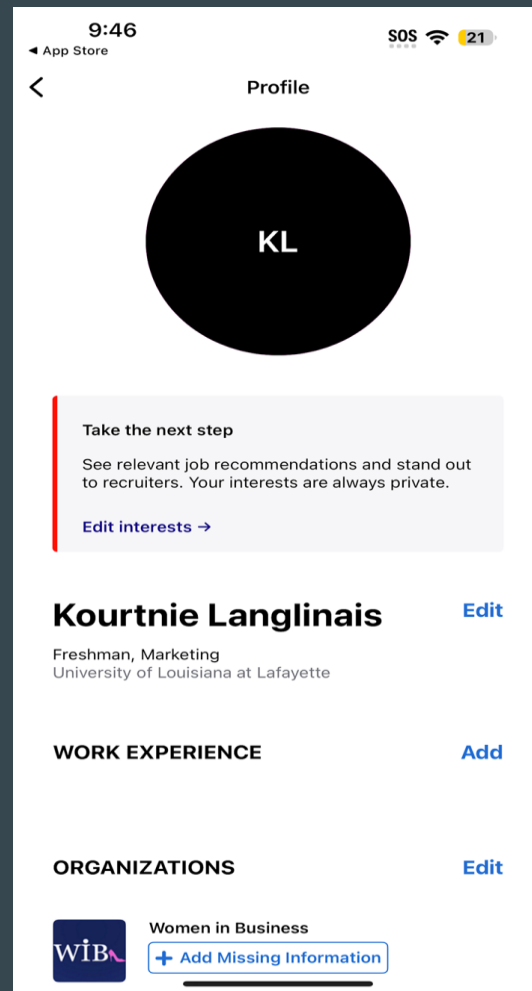

Volunteering at the Cupboard really gave me a better appreciation and understanding of the concept and purpose of it. Working with other volunteers and doing tasks around the cupboard was actually super fun. While I was there, I hung clothes upstairs, stocked shelves with personal hygiene materials, and stock the back shelves/storage of food for future purchase. This place really does give students a very convenient way to sustain a good way of living while away at college.

# Kourtnie Langlinais

Volunteering at the Campus Closet wasn't the funnest thing to do but I enjoyed the thought of helping other in any type of way because some people aren't as fortunate as others. I'm really glad that campus has something like this so people are able to have things when they are in need.

Handshake is a good way for you to find jobs based on what you put on your very own profile in order to get a good job that fits for you.

# Luke Chaisson

Volunteering at the campus closet was an overall great experience. Although the stuff I was doing wasn't the most exciting thing in the world, it still felt good to know that I was helping in SOME way.

Even though I was most likely going to set up Handshake eventually, this project pushed me to set it up sooner rather than later so that I can start filling things in like work experience.
